

Programme Formation Strapping

Formateur :
Jean-Michel Grand,
Kinésithérapeute
Ostéopathe DO.
Master 2 Recherche Motricité, Performance, Santé.

Objectifs :

Formation théorique et pratique d'une journée et demi ayant pour objectif de vous initier à l'application du Strapping (Contentions souples adhésives, CSA) pour le traitement et la prévention des pathologies sportives. Les bases biomécaniques et la physiopathologie des pathologies sportives sont abordées à partir de supports pédagogiques d'anatomie fonctionnelle en 3D.

Les principes, bases et applications des différents montages permettront aux stagiaires d'acquérir

- une bonne maîtrise des techniques de CSA,
- d'élargir leur arsenal thérapeutique appliquée aux pathologies sportives, une meilleure compréhension des pathologies tendineuses, musculaires et articulaires liées à la pratique du sport.

PREMIER JOUR

13h30 Arrivée des participants et modalités administratives

14h00 Partie théorique :

Biomécanique du contrôle proprioceptif et Physiopathologie sportive

- Statistiques, Bibliographie, Epidémiologie sportive
- Défaillance des ligaments actifs

14h30 Bases, principes et applications des Contentions souples Adhésives (CSA)

- La pharmacie du kiné du sport
- Les différentes catégories et types de bandes
- Les différentes techniques de pose
- Indications des CSA
- Principales différences entre le strapping et le Taping Neuromusculaire

15h00 Présentation et application pratique des CS compressives post traumatiques

- Contusions musculaires (Lésion musculaire extrinsèque)
- Elongations (Lésion musculaire intrinsèque)
- Compressions articulaires (Genou, Cheville)

16h00 Pause

Siège social : 10 rue Henri Arres, 66430 Bompas.

Tel : 06 70 88 71 60. Courriel : Contact@performe.fr

N° déclaration d'activité : 91660165166 – SIRET : 78943175600012

16h30 Présentation et application pratique des CSA de suppléance tendineuse

- Tendinopathie Calcanéenne
- Tendinopathie Patellaire
- Aponévrosite Plantaire
- Périostite Tibiale

18h00 Fin de la première journée

SECOND JOUR

8h30 Arrivée des participants et café

9h00 Présentation et application pratique des CSA Articulaires

Membre inférieur

- Genou (LLI, LLE, LCAE)
- Cheville (LLI, LLE, Diastasis tibio-fib, Sd carrefour post)
- Hallux (Valgus, Rigidus)

11h00 Pause

11h15 Présentation et application pratique des CSA Articulaires

Membre Supérieur

- Epaule (Acromio Clav, GH,)
- Coude (LLI, Hyperextension)
- Poignet

12h30 Déjeuner

14h00 Présentation et application pratique des CSA Articulaires de la main

- Doigts (AMP, IPP, IPD)
- Pouce (AMP)

15h00 Pause

15h15 Présentation et applications pratiques de strappings de cas cliniques concrets

- Situations de terrain
- Situations post traumatiques au vestiaire
- Soins infirmiers pour petites plaies et phlyctènes
- Strappings spécifiques de sports (Rugby, Football, Basketball...)

16h30 Evaluation pratique collective de Fin de stage

Mise en situation pratique du strapping sur cas cliniques concrets

17h30 Fin du stage

Bibliographie :

1 A comparison of augmented low-Dye taping and ankle bracing on lower limb muscle activity during walking in adults with flat-arched foot posture.

2 A critical appraisal and literature critique on the effect of patellar taping – is patellar taping effective in the treatment of patellofemoral pain syndrome. Mark Overington, Bhsc (Physio) DamianGoddard, Bhsc (Physio) NZ Journal of Physiotherapy – July 2006, Vol. 34 (2).

Siège social : 10 rue Henri Arres, 66430 Bompas.

Tel : 06 70 88 71 60. Courriel : Contact@performe.fr
